

REVENUE OPERATING SYSTEM

AXIOM

*makes your revenue **self-evident**.*

WHAT MAKES MONEY? · WHAT WASTES BUDGET? · HOW TO GROW PROFIT?

MOST OWNERS FLY BLIND

95%

believe they measure their
marketing ROI

25%

actually do it consistently

Marketing is a black box. You spend. Something happens. *Nobody tells you why.*

THE UNCOMFORTABLE TRUTH

Whoever owns the customer data owns the **business**.

Right now, that isn't you. Your data is scattered across Meta, Google and your contractor's spreadsheet — you have no base of your own.

- A platform hikes rates or bans your account — and access to your customers is gone.
- A marketer or agency leaves — and takes the base with them. You're left with nothing.
- Every campaign, you pay again to reach people who already bought from you.

Without your own base, you're *renting your own customers*.

RELIEF · YOUR ASSET

Now the data is yours. So is the **business**.

AXIOM builds your customer base and hands it to you — for good. The threat to your business is gone, and marketing's silver bullet is in your hands.

Grows every day

Built from your site and socials: every visit and touch becomes a profile. A month is already a base.

Enriched with real data

Interests, social, geo — from ad channels and social.

Yours forever

Export in one click (CSV · Excel · API). Leave and your data stays — no lock-in.

THE SOLUTION

Marketing, translated into dollars.

CONNECTS

Google Ads, Meta, GA4, Stripe, Shopify, HubSpot — in minutes.

UNIFIES

Spend, revenue and rankings — one honest picture, by actual payments.

EXPLAINS

What happened, why, and what to do — in language an owner reads.

Dashboards tell you what happened. *AXIOM tells you what to do.*

What you see first.

A real screen — no analyst required.

- The bottom line, one sentence**
"Spent \$18,400, made \$61,200." Words, not a chart to decode.
- Profit, not vanity metrics**
Four numbers an owner cares about: spent, made back, per \$1, kept.
- Where the money goes**
Budget by channel, biggest first — Meta eats 45% at a glance.

What works, what leaks, what to do to grow profit.

The translator at work.

- 1 **Green earns, red leaks**
Sorted best to worst — by return per \$1. No guessing.
- 2 **The "why", in plain words**
"Spent 34% more, sales fell 25%." With numbers, never invented.
- 3 **What to do, in order**
Stop the leak · double down · easy win. Each tied to the data.

Organic traffic — finally clear.

Visibility and competitors — no SEO degree.

- You vs competitors**
Visibility month over month — who's pulling ahead on the money keywords.
- Keywords on the move**
What's rising, what's falling — and how many customers that is.
- Tied to ROI**
Closing the SEO gap is cheaper than buying the same traffic with ads.

Email that wins customers back.

Personal, by purchase history — not a blast.

- Personal offers**
 Each customer gets their own, by purchases and behavior. Not a list-wide blast.
- Less churn**
 Dormant customers won back in time — before they're gone for good.
- Higher order value**
 Upsell and cross-sell by history — at the right moment.

app.axiom.io / brew-co / social

BREW CO.

REDDIT · X · TIKTOK · YOUTUBE

See demand **before** you spend on ads.

Trends across your audience & geo

"cold brew"	↑ +38% mentions
"oat milk"	↑ +52%
"coffee subscription"	↑ +21%

Hypotheses to test

offer: subscription
SKU: oat milk
format: poll in stories

Social as demand recon.

Test hypotheses by listening, not by budget.

- Demand recon**
 What people actually want — before you spend on ads.
- Fast hypothesis testing**
 Listen across Reddit, X, TikTok, YouTube instead of burning test budget.
- Trends & sentiment**
 Across your audience and geo — what's rising right now.

Booking with a brand manager's memory.

Seasonality, client history, proactive touches.

- 1 **Booking + client context**
Knows seasonality and history — who came, when, and for what.
- 2 **Reminds ahead of time**
Re-book nudges and seasonal offers — before the client drifts to a competitor.
- 3 **Feedback after service**
Asks for a review in messages — like a real brand manager.

Sees trends before you do.

Past seasons + demand shift from social, by audience & geo.

- 1 Seasonal forecast**
Based on prior years — adjusted for momentum and demand trends.
- 2 Risks — early**
Flagged before they hit. Time to act ahead of them.
- 3 Opportunities — don't miss**
What you can't afford to miss, based on the trends.

HOW IT WORKS

YOUR DATA → METRICS → EVIDENCE → ANSWER → ACTION

The AI explains every number. *It never makes them up.*

Every claim links to the raw row and the payment behind it. You see not just *what* happened, but *why* — and you can verify it.

WHO IT'S FOR · TWO PATHS

One engine — two go-to-markets

DIRECT

SMB · founders · growth teams

Know exactly where your money works — without hiring an analyst. One source of truth and ranked actions, end of the channel debate.

WHITE-LABEL

Agencies

Senior-strategist answers for every client — under your brand, at scale. Client-ready reports instead of manual Looker.

WHAT CHANGES

Less wasted budget. More decisions that move profit.

Every \$ with a clear ROI

Return per channel by actual payments, not an "average" result.

Decisions in minutes

Not weeks of manual reports. Ranked actions, with proof.

One source of truth

Instead of ten tabs and conflicting exports.

WHY "AXIOM"

*An axiom is a self-evident **truth** that
needs no proof.*

We make your **profit** one.
